

FCC, I am writing in response to the action you are pro-posing to let new LPFM stations take priority over the current FM translator service. This translator service is of great value to the community in which I live. I look forward each day to tuning in and receiving programming. I support the translator stations for(K-Love and have for several years.) My husband and I support financially as well as word-of-mouth gaining them many avid listeners. The effect on this local community if K-Love were to be taken off the air would be discouraging, isolating and infringing on the rights of those of us who have supported them and expect to be served by them. The K-Love station is uplifting, informative, encouraging and just plain fun to listen to. It's a breath of fresh air on some mighty polluted air-ways. You should be thrilled to have stations like K-Love that promote healthy, moral life styles to encourage our problem infested nation.
